TEKNIK (GSSG Tech Solutions LLP) →

The community of engineering students in and around Kolkata aren't new to TEKNIK. A humble endeavor that began just two years ago is today a brand that is synonymous with top quality industrial trainings and best rated projects. The company's engineering services have successfully delivered projects on embedded and integrated IT solutions, automation and instruments. TEKNIK is all set to become the next big thing in the sectors of engineering training and services.

We believe that any education that is all about projects and trainings is not education. We strongly advocate learners' enjoying the process of gaining knowledge. Hence, TEKNIK proudly and enthusiastically presents a 4-days/3-nights excursion and trekking trip to Tilaboni Hillock, Purulia. This trip will include exciting hill climbing sessions and a workshop on developing Quadcopters. In short, it will be four days of intense learning and once-in-a-lifetime fun!

MQC (Mountain Quest Calcutta) →

Since inception in the year 1995 Mountain Quest of Calcutta is active in the two spheres; one to make regular inroads into the Himalayas either as climbing peaks or exploratory treks, the other to make youngsters love the spirit of adventure by means of rigorous rock climbing arranged under their Banner. This is why most of our members are A Grade holders of Basic and Advance Courses from HMI and NIM, etc. We are proud of our member Ramesh Roy who has scaled Mount Everest.

WHY Do We Need This Session ? →

The biggest disadvantage of education restricted to classrooms is that it focuses primarily on covering syllabi. Thus, no matter how interesting the course is or teachers are, after a certain period the classes become boring. Also, classroom teaching almost does nothing to enhance personalities of students. It does not teach life skills.

We at TEKNIK decided to step out and allow ourselves to be taught by nature. With a little bit of careful planning we have created a schedule that is going to change you as a person by the time you pack your bags to return home. Come, be a part to know what team work and survival skills mean and enrich yourselves.

Finally, you will get two certificates (for the workshop and trekking) that you will be able to use to gain marks according to the newest rules of the Maulana Abul Kalam University of Technology. It doesn't get better than this, right?

80/3 Battala Bye Lane – 1, Hindmotor,

FEATURES

followed by trekking, and hill climbing. Assurance of excitement is covenant when we accelerate the 90 degree gradient with top rope as well as trad climbings.

Quadcopter: The course will be accompanied by intense under-the-sky camp workshop sessions on an "Aerial RC Robot" combining a simple propeller mechanism with powerful electronics. These hands-on sessions will help the participants to develop a quadcopter from scratch while understanding the physics and various engineering concepts in making a working unmanned aerial vehicle.

Night Life: Night Life: Can anything get better than a campfire gathering under the stars? This is something we don't do much these days in this cyber world. Campfires will give opportunity to students for improvising their public speaking skills as well as developing personality. Asemblence of experience sharing along with powerpoint sessions will be organized as the fire crumbles into ashes.

Safety Measures: We understand the concerns of your parents about this trip. So let us assure all of you and your parents that all arrangements of safety will be made. Strictest discipline will be in practice throughout the trip. The student-teacher ratio would be a world class 5:1. Trekking will be done under the supervision of Mr. Ramesh Roy who is a renowned Mt. Everest summiteer. He will have on ground his entire team to assist us.

FEATURES

Registration Fees: ₹ 5500 Only

Our Other Training Programs.

- AVR/Arduino- Home automation.
- Arduino-IOT.
- Arduino Mobile System Using GSM-900.
- Line Follower & Obstacle Detection.
- Gesture Control Robotics.
- Web Development.
- Ethical Hacking.
- Android.
- Core Java.
- Python Programming Language.
- Raspberry Pi, Python & IOT.
- AVR Microcontrollers.
- PIC Microcontroller (Industrial Graded).
- ARM 32 Bit Cortex-M4 Microcontrollers.
- Nuvoton Microcontroller (Industrial Graded).
- Industrial Automation Using PLC & SCADA.
- VLSI Using EDA Tools.
- 3D Design & Printing.
- PCB Design & Fabrication.
- IC Engine Designing.

Manufacturer, Supplier, Trader and Exporter of
Electronics Engineering Laboratory set up,Electricals
Engineering lab set up,Electronic Meter, Lab Equipment,
Solar Light and many more products.
